ABOUT US

Introduction

Our goal, with every product and service we offer, is to increase your company's productivity through improvements in efficiency and effectiveness. Intelligent Computing offers the latest technologies and our extensive experience to ensure that you are provided with state-of-the-art products along with exceptional customer service. As an Intelligent Computing customer you will be provided with constant support and protection from down time and technical assistance for any needs you may have. We offer you is minimal down time and effective solutions to all your IT needs.

Mission

To be the best in our field, offering our clients unrivalled service and quality

Vision

To ensure that we have the best team members whose talent and commitment is geared in the best interest of the organisations and the client.

Core Values

Collaboration:

We are dedicated to a constructive, team-oriented environment, gathering varied perspectives, sharing knowledge, and building effective partnerships with key stakeholders.

Continuous Improvement:

We strive for operational excellence through the on-going development of the staff and the organization as a whole.

Innovation:

We encourage creative and critical thinking in the development of technology services and solutions.

People:

We listen to, respect, and care for team members both professionally and personally.

Service:

We strive to provide excellent service by being consistent, agile, reliable, and accessible to all.

Transparency:

We leverage open communications and thoughtful business processes to be accountable in our interactions and our work.
